

Commercial Turf Sales & Service

25-5-15

**92% Nutralene
Slow Release**

Turf King 25-5-15 is formulated with 92% Nutralene Slow Release Nitrogen.

Methylene Urea provides a steady long lasting feed and great color.

METHYLENE UREA TECHNOLOGY

Optimum particle sizing for a variety of turfgrass heights.

47.5% of total nitrogen (N) is water-insoluble nitrogen (WIN) and low salt index of 25

Broken or damaged particles don't affect nutrient release rate

Feeds turfgrass for up to 16 weeks. Consistently metering nutrition

HOW IT WORKS

Release is triggered by soil temperature and microbial activity in unison with turf grass demand.

Typically 50% of its nutrition is release in the first 4 to 6 weeks.

Another one-third of the N source is released in 6 to 12 weeks.

The remainder is released beyond 12 weeks.

Description	25-5-15 w/ 92% Nutralene Slow Release & SOP
N Source	Methylene Urea
Product Size	SGN 220
Product Use	For use on fairways, roughs and surrounding areas
Packaging	50 lb. per bag & 45 bags per pallet
Application	Apply to turf grass with a rate of 4 - 6 pounds of product per 1000 sq. ft. See label for more details.
